The Biology of Belief: Unleashing the Power of ...

The Biology of Belief explores how cells receive and process information. Implications of this research radically change our understanding of life, showing that genes and DNA do not control our biology; instead, DNA is controlled by signals from outside the cell, including the energetic messages emanating from our positive and negative thoughts. For decades, genetic determinism—that is, the idea that our genes are fixed, immutable, and outside of our conscious control -- was the prevailing ...
