The idea that money is the variable that really matters in science policy can be sustained by two widely held beliefs. First, as Vannevar Bush taught the world in Science, the Endless Frontier, science policy is easy: if you add more money, you'll get more science, and the world will get better. Second, because more science delivers more truth, as long as politicians and policy-makers listen to what scientists are saying, they'll make the right decisions about how to deal with the many ...
