to the security, privacy preserving and energy efficient data transmission. Emergence of the internet of the things have made systems more vulnerable. Privacy and the security of the systems have become pre-requisite for every service. There are a few already proposed solutions which ensure privacy and the security of the system.

## Privacy and Security Mechanisms for eHealth Monitoring Systems

The goal of privacy and security is to ensure that the technologies and information that are generated as part of the eHealth initiative are only used for their intended purposes. Privacy and security of patient information is just one part of eHealth, but it is arguably one of the most important components. HIMSS Highlights. At this year's HIMSS conference, my presentation will focus on making the patient the central focus in discussions about eHealth, privacy, and security.

## Privacy and Security's Role in the eHealth Transformation ...

Privacy and security in eHealth really needs to be something that is thought of right from the beginning. If you think of eHealth as a machine and with all of its cogs, privacy and security are like the oil that lubricates the cogs. Without it, everything breaks down but you really don't want to know that it's there.
