Theory Of Computation Sipser 2nd

If $k < m/2$, then H is the graph obtained from G by adding j nodes, each connected to every one of the original nodes and to each other, where $j = m - 2k$. Thus H has $m + j = 2m - 2k$ nodes. Observe that G has a k -clique iff H has a clique of size $k + j = m - k$ and so $(G, k) \in \text{CLIQUE}$ iff $(H, m - k) \in \text{CLIQUE}$.
