The Standard Model of particle physics is the theory describing
three of the four known fundamental forces in the universe, as
well as classifying all known elementary particles. It was
developed in stages throughout the latter half of the 20th
century, through the work of many scientists around the world,
with the current formulation being finalized in the mid-1970s
upon experimental confirmation of the existence of quarks. Since
then, confirmation of the top quark, the tau neutrino, and the Hi
