Big Data | Guide books

Nathan Marz is the man behind Apache Storm, and he also invented the Lambda Architecture Model for big data systems, so it's no surprise that this book, which

has the subtitle "Principles and best practices of scalable real-time data systems" is in fact an in-depth looks at how you can use the Lambda architecture model (LAM) for managing big data. The idea behind LAM is that big data databases are too large to manage and query in real time, so you split them into a batch layer where you ...
