Queries Explained A

For the past year I've

written quite a lot of

search queries and

search query rewrites

via query rules in

SharePoint 2013 both

in customer projects

and for presentations.

Although there is

documentation out

there for the gumshoes

out there, I though I'd

digest it all into a

series of blog posts.

Tech and me: SharePoint Search Queries Explained - The Series

Search Query Rules in SharePoint and Office 365 help to support the users' search intent, by creating pre-defined rules which apply to the user queries. A Query Rule always consists of three different settings: Query condition (s): Define the conditions when a user's search box query makes this rule fire.

SharePoint Search Query Rules ... - Search Explained

Many of the classic search features are available on the search administration page in the SharePoint admin center. 1. Make sure the content can be

found. The content must be crawled and added to the search index for your users to find what they're looking for when they search in SharePoint. Microsoft Search uses the same index of SharePoint content as classic search does. See how you can make content searchable, and how you can crawl content to get it into the search index.

The query framework of SharePoint 2013 is a vast one, and it takes time to learn and master. In this session, you will get an overview of the latent capabilities with query rules and learn how you can maximize the use of query rules when building search driven pages using the

Content by Search web part.

Search Queries Explained - A Deep Dive into Query Rules ...

You can configure a query transform to replace properties of a query, such as the result source that the query will use to get search results, or the sort order that it will use when it displays search results. The transform also replaces the text of the query by using a query template that you can configure.

Understanding query transforms - SharePoint

Query suggestions are words that appear below the search box as a user types a query. SharePoint automatically creates a

query suggestion when you've clicked a search result for a query at least six times. In the classic search experience you can also import your own lists of query suggestions to SharePoint. Learn about managing query suggestions.

Show the right search results - SharePoint in Microsoft ...

If you type "dev*" in the following field, the "*" is a common string. You need to type "dev*" in search box to trigger this query rule. Then "contentclass=STS_Site Title: {subjectTerms}" will work, which parses "*" as a special character.
