Re: 1986 Merc "Black Max" 200 - Question about "warning beeper" Yes the off-brown wire will sound the beeper by driving it to ground but when an oil

fault occurs the module pulses it (beep beep beep) instead of the constant beep of the overheat sensor. A sign of a dead or intermittent module is no beep when the key is turned on.

1986 Mercury Black Max 200 Service Manual

Hi, I just picked up a Mercury Black Max 2.4 liter engine from 1985 (according to it's serial number). My guess is that engine is stock, but I really have no idea. I ran a compression test on it and it read between 129 and 132 psi on all 6 cylinders. I think all on starboard side had 129-130 and all on port side read 131-132. I will run this on a 17-ft bass-boat-like off-shore racing boat.
