Not a Drop to Drink Harper Collins

Fans of classic frontier survival stories, as well as readers of dystopian literature, will enjoy this futuristic story where water is worth more than gold. New York Times bestselling author Michael Grant says Not a Drop to Drink is a debut "not to be missed." With evocative, spare language and incredible drama, danger, and romance, Mindy McGinnis depicts one girl's journey in a frontierlike world not so different from our own. Teenage Lynn has been taught to defend her pond against every threat: drought, a snowless winter, coyotes, and most important, people looking for a drink. She makes sure anyone who comes near the pond leaves thirsty—or doesn't leave at all. Confident in her own abilities, Lynn has no use for the world beyond the nearby fields and forest. But when strangers appear, the mysterious footprints by the pond, nighttime threats, and gunshots make it all too clear Lynn has exactly what they want, and they won't stop until they get it. . . . For more in this gritty world, join Lynn on an epic journey to find home in the companion novel, In a Handful of Dust.

Fencing with the King: A Novel *W. W. Norton & Company*

A mesmerizing breakthrough novel of family myths and inheritances by the award-winning author of Crescent. The King of Jordan is turning 60! How better to celebrate the occasion than with his favorite pastime—fencing—and with his favorite sparring partner, Gabriel Hamdan, who must be enticed back from America, where he lives with his wife and his daughter, Amani. Amani, a divorced poet, jumps at the chance to accompany her father to his homeland for the King’s birthday. Her father’s past is a mystery to her—even more so since she found a poem on blue airmail paper slipped into one of his old Arabic books, written by his mother, a Palestinian refugee who arrived in Jordan during World War I. Her words hint at a long-kept family secret, carefully guarded by Uncle Hafez, an advisor to the King, who has quite personal reasons for inviting his brother to the birthday party. In a sibling rivalry that carries ancient echoes, the Hamdan brothers must face a reckoning, with themselves and with each other—one that almost costs Amani her life. With sharp insight into modern politics and family dynamics, taboos around mental illness, and our inescapable relationship to the past, Fencing with the King asks how we contend with inheritance: familial and cultural, hidden and openly contested. Shot through with warmth and vitality, intelligence and spirit, it is absorbing and satisfying on every level, a wise and rare literary treat.

Protect Or Plunder?

Understanding Intellectual Property Rights *Zed Books*

The kinds of ideas, technologies, identification of genes, even manipulations of life forms that can be owned and exploited for profit by giant corporations is a vital issue for our times. The author argues that this Western-inspired, unprecedented widening of intellectual property concepts does not in fact stimulate human creativity and the generation of knowledge. Instead, it is being exploited by transnational corporations to increase their profits at the expense of the health of ordinary people and of the age-old knowledge and independence of the world's farmers. Intellectual protection is being transformed into corporate plunder. Little wonder popular feeling runs so high against the WTO that polices this new intellectual order, and the pharmaceutical, biotech and other corporations that benefit from it.

Economic Principles

The Masters and Mavericks of Modern Economics *Simon and Schuster*

For nearly ten years, readers of the Sunday Boston Globe and newspapers around America have delighted in David Warsh's column, "Economic Principals." This collection shows why. Taken as a whole, Warsh's writings amount to a vast and colorful group portrait of the personalities who dominate modern economics -- from the luminaries to unknown soldiers to eccentrics who add sparkle to the tapestry. Partly a history of controversies in economics, partly an essay on the evolution of the field, Economic Principals offers a glimpse of one of the most important stories of our time: the metamorphosis of a priestly class of moral philosophers into the mathematical mandarins of today, whose ideas are reshaping society even as they reveal its workings in ever more subtle detail. Warsh first recounts the rise of the economic paradigm, deftly treating the rediscovery of Adam Smith and the centrality of markets. He then turns to the generation of economists for whom the Nobel Prize was created in 1969, the men who forged the modern field in a few years during and after World War II. Some, like Paul Samuelson and Milton Friedman, are well known to the public; others, like Trygvie Haavelmo and George Dantzig, are less quickly recognized. But all have interesting stories which Warsh brings to light. Tracing the high tech revolution to the current generation, he sketches younger scholars such as Jeffrey Sachs, Martin Feldstein, and others less popularly known, who rule the field today. Marking the most powerful applications of modern economics, Warsh explains how the ingenious "rocket scientists" of Wall Street are creating new markets and the business school wizards and leading corporate executives are reinventing the organization. Finally, in exploring the implications of modern economics, Warsh introduces us to scholars operating on the boundaries of the field, from Jane Jacobs to Noam Chomsky, and to the critics, like Donald McCloskey and Robert Reich, who have brought a bit of moral philosophy back into the economist's brave new world. At every step, Warsh maps the field with the journalist's eye for detail. Readers will see why he is considered one of the most consistently stimulating economic journalists in America today.
