simple and compound probability worksheet answers

The probability of an event $P(E)$ can be determined by two factors: number of times an event happens (N) total number of possible outcomes (O) Mathematically, $P(E) = N/O$. $P(E)$ can also be represented using a line called probability line. In a probability line, 0 represents an impossible event while 1 represents a certain event. $P(E)$ can only occur between 0 and 1.
