Elevated amounts of heavy metal in water leads to all kinds of deleterious effects on fish and other aquatic species, but bioaccumulation takes the damage to a whole new level.

Engineers Find Way to Remove Heavy Metals from ...

The oxides are much less reactive than the pure metals. $4M(s) + O_2(g) \rightarrow 2M_2O$ $4M(s) + O_2(g) \rightarrow 2M_2O$. The oxides react vigorously with water to form a hydroxide. The resulting hydroxides of these elements dissociate completely in water to form some of the strongest bases known.

Metals | Boundless Chemistry

The evaporation process is driven by heat transferred from condensing steam to a solution at a lower temperature across a metallic heat transfer surface. The absorbed heat causes vaporization of the solvent, usually water, and an increase in the solute concentration. The resulting vapor may be vented to the atmosphere, or condensed for reuse.
