Chinese shadow banks | China Banking News

Abstract. In this paper we attempt to characterize the stability of shadow deposits in China with interest rate liberalization and fintech developments. We emphasize that shadow banks provide higher but riskier returns and such characteristics affect the stability of shadow deposits. In our setting, the stability of

shadow deposits is influenced by two offsetting effects, namely: the patience effect, which makes investors more willing to wait because of the potentially higher returns; and ...

Do Interest Rate Liberalization and Fintech Mix? Impact on ...

So, wealth management products are a major source of funding for China's shadow banking system. They grew by 80% from the end of 2014 to Renminbi 27 trillion, more than U.S. 4 trillion, in the third quarter of 2016. And now, they are equivalent to one-fifth of bank deposits in China, which is a lot.
