Introduction To Acids And Bases

In the late 1800s, Svante Arrhenius defined an acid as a substance that increases the hydronium ion (H_3O^+) concentration in water, and a base as any substance that increases the hydroxide ion (OH^-) concentration in water. Acids and bases react with one another in a process called neutralization to form a salt and water. Hydrochloric acid neutralizes potassium hydroxide forming potassium chloride (a salt) and water:
