The shift interlock solenoid is an important safety feature on your vehicle. It keeps you from shifting out of park unless the vehicle is in the on position and the brake pedal is depressed. If the vehicle will not shift out of park, chances are the shift interlock solenoid has gone bad. YourMechanic makes getting repairs to your shift interlock solenoid easy by coming to your home or office to diagnose or fix issues. You can book a service online 24/7.

### Symptoms of a Bad or Failing Shift Interlock Solenoid ...

The shift interlock solenoid ensures you can't shift from Park to Drive without first applying the brake. The solenoid inside the interlock system is what allows you to move the shifter. When the brake pedal is pressed, the solenoid receives a signal that releases a mechanical lock on the shifter and allows it to be moved. The shift interlock solenoid also enables the shifter to be moved from Neutral to Reverse and, from Reverse to Park.

1) there is a way to remove the shifter from park if the interlock does not work, and you will not break it. With your foot on the brake, turn the key to the first notch - before the dash lights come on. You can shift out of park and into neutral at that time. Turning the key the rest of the way, you can start the car. Be aware that you may have no brake lights if this is what it takes to get you out of park.
