There are two types of mechanical ventilation systems used in industrial settings: Dilution (or general) ventilation reduces the concentration of the contaminant by mixing the contaminated air with clean, uncontaminated air. Local exhaust ventilation captures contaminates at or very near the source and exhausts them outside.

Industrial Ventilation - Health Safety & Environment

A modern industrial ventilation system is made up of ducting, fans & filters. Together, these components help to alleviate problems associated with poor air quality. In environments where fumes, dust, humidity and odours are a concern, ventilation systems will ensure a safe and pleasant working environment.
