 Residency  
 Application**

**A Guide to Achieving  
 Success** *Springer  
 Nature*

This unique, socially  
 conscience reference  
 provides valuable  
 guidance to  
 international medical  
 graduates (IMG's)  
 looking to complete a

residency in the United  
 States. The medical  
 residency application  
 process in the United  
 States is competitive  
 and complex.  
 Additionally, many  
 IMG's go through  
 training programs that  
 sharply differ from the  
 medical school training  
 and the sociocultural  
 elements of United  
 States medicine and  
 residency are unlike  
 any other country.  
 Organized into three  
 parts, this book meets  
 the need for a  
 pragmatic, evidence  
 based guide that  
 answers important  
 questions, and imparts  
 indispensable advice to  
 IMGs. Part I directly  
 tackles the concerns  
 IMG's have regarding  
 specific elements of  
 residency applications,  
 including the  
 importance of a  
 master's degree and

how to get a strong letter of recommendation. Part II then addresses how to prepare for interviews, preliminary programs and travel. Finally, the book answers the common “what ifs” and “what’s next” questions many IMG’s ponder. *International Medical Graduate and the United States Medical Residency Application: A Guide to Achieving Success* is a first-of-its-kind resource that presents a holistic view of residency application peppered with real life examples, easy to grasp tables and flow charts and key do’s and don’ts to drive home the complex process involved in residency application.

### **Atlas of Salivary Gland Pathology** *Springer*

Surgical pathologists play a central role in patient surveillance and treatment by

surgeons, radiation oncologists, and medical oncologists. Although salivary gland tumors are uncommon overall, their histopathologic diversity and challenge command the attention of practicing surgical pathologists. *Atlas of Salivary Gland Pathology* focuses on the diagnostic approach to salivary gland neoplasia—one of the more challenging fields within surgical pathology—emphasizing the need to understand downstream implications with respect to patient surveillance and treatment. The presence of formidable histologic mimicry in salivary gland neoplasia is well-documented in the

pathology literature and has also been observed in the consultation practice of the volume editor. This textbook is designed with the needs of practicing surgical pathologists and pathologists-in-training in mind, providing a comprehensive overview of both common and rare salivary gland neoplasms. The primary educational objectives for readers include the following:

- 1) distinguish benign from low-grade malignant salivary gland neoplasms, 2) effectively use histochemical, immunohistochemical, and cytogenetic studies in challenging cases, 3) understand which diagnoses merit additional surgery and/or adjuvant therapy (radiation, chemotherapy), and 4) enhance pathologist-to-clinician communication in the setting of salivary gland disease.
