Single-Wavelength Lidar. The principle of lidar is that a laser pulse is fired into the atmosphere and as it proceeds along its path, radiation that is scattered by aerosol and other particles is directed back toward the laser where it is collected with a telescope and measured with a detector. The lidar system can be operated either in single- or multi-wavelength mode (by using a tuneable laser) so as to detect a number of different species according to the attenuation they cause at ...

LiDAR Teach-In

Lidar (or LiDAR or LIDAR) is an acronym for Light Detection And Ranging. The term is also a fusion of the words Radar and Light. Like radar, lidar is an active remote sensing technology but instead of using radio or microwaves it uses light. Because lidar systems provide their own energy they can be used in the day or at night.
