Computer Speaker Connections Guide

On most portable speakers, the right-channel speaker is the "main" speaker with the volume knob, and it often has two or more wires coming out of the back. One of these wires should connect to the left speaker, and another should have a 3.5 mm mini plug that connects to your computer's audio output jack. If your speakers require a power source to amplify the audio, there should also be a power cord.

How do I connect computer

speakers?

Many other non-USB cables can also connect to your computer via a USB converter; these cables have the standard USB-A connector on one end while the other end could have connections for other ports such as Ethernet or audio. 2. Audio Cables and Connectors 2.1 - 3.5mm headphone jack. The most common audio cable is the standard headphone jack, otherwise known as a TSR connector. It is available in several sizes, but the most common ones used with computers are the 3.5 mm or 1/8" mini audio jack.
